

Kanban Board - Personal Habit Tracker

Interviews were conducted with Students, Working Professionals, and Travelers to gather user needs.

To Do

- Design habit tracker screen UI
 - Set up basic Java project structure (Eclipse)
 - Build login functionality
 - Build habit creation form
 - Build progress tracking chart
 - Test login and authentication
 - Test habit tracking features
 - Fix bugs and polish UI
 - Prepare final project report/documentation
 - Final deployment or submission
-

In Progress

- Design login screen UI (basic wireframe)
-

Done

- Prepare interview questions
 - Conduct student interview
 - Conduct working professional interview
 - Conduct traveler interview
 - Write user requirements document
 - Set up GitHub repository
 - Set up folder structure (interviews, requirements, kanban, scrum)
 - Write project README.md
-

Notes

- Tasks will move from **To Do** → **In Progress** → **Done** as the project advances.
- Final Sprint includes full testing, bug fixing, and final deployment.
